National Oceanic and Atmospheric Administration (NOM) Weather Radio Expansion Project

BASIC GOAL

**To provide the
citizens of Iowa
with a statewide
multi-hazard
warning system**

Weather Rad-io Coverage prior to 1999

- 10 transmitters that provided coverage in 41 counties
- 58 counties, many in rural areas, with no tone alert NOAA Weather Radio coverage

Overall Scope

- \$ 1, 158,888 - federal/partners
- Place 25 transmitters at EXISTING tower site locations
- Secure DONATED tower space for placement of transmitter/equipment
- Tower must be in weather service's "best fit" for coverage
- Promote NWR receivers to general public

Partners

- Iowa Association of Electric Cooperatives
- Iowa Department of Public Safety
- Tower Owners to date
 - NE Missouri Electric Power Coop. (funds)
 - Webster County
 - KIMT - TV Mason City
 - Alliant Energy
 - Mid-American Energy
- Radio Shack (funds)

Project Highlights

- Iowa Association of Electric Cooperatives agreed to be partner on a grant application to the Federal Emergency Management Agency (10/97)
- Grant approved; \$675,000.00 federal funds (10/97)
 - grant amount increased to \$869,166.(3/99)
 - Crown Broadcast chosen as the only approved vendor of transmitters by the National Weather Service (10/98)

Project Highlights

- First transmitter installed & gifted - Ft. Dodge (12/99)
- Transmitter installed & gifted - Burlington (3/00)
- Transmitter installed & gifted - Fairfield (3/00)
- 3 Transmitters installed - LaPlata, Lancaster and Kahoka, MO, as part of Iowa project (4/00)
- Tower rigged and Transmitter installed - St. Ansgar (9/00)

Project Challenges

- Locating **donated** tower space
- National Weather Service sign off on tower site
- Lease agreements between tower owner and National Weather Service

Status as of 2/1/01

- 7 installed, 6 gifted to National Weather Service
- 4 at the lease agreement stage
 - 4 scheduled tower visits by state
 - 2 waiting on NWS tech visit
- 7 searching for agreeable tower owner
- 1 preliminary tower owner approval, site may not be needed

See attached map

What's next?

As the project has grown in magnitude and complexity, additional staff have been assigned to assist in the search for donated tower space. Emergency Management Division continually works in partnership with various agencies and entities in a search for "best fit" tower locations for the remaining unidentified transmitter sites.

It is our hope the project will be completed during 2001. However, in working within the constraints of the project and asking for donated space, this date may not be achievable.

The Process

- a Obtain tower search information from NWS Central Region Headquarters, if not previously provided
- a Review tower search information to determine height of tower, and closest location to overall expansion project "wish list"
- a Contact tower owner. explain overall project to owner, emphasizing public service and donated space
- Provide any needed information regarding equipment and specifications

The Process

- a If owner agreeable, obtain information needed for signal profile. (latitude/longitude at site, and height at which antenna can be placed
 - Optimum antenna placement height is 200' and above
 - Do NOT want to have antenna extending above top of tower
- Send information obtained for signal profile to NWS requesting a signal profile; If signal profile shows positive coverage area, schedule tower visit for completion of site survey form; survey information provided to NWS
- a Request NWS Central Region headquarters schedule tech visit to site for their approval

The Process

- Once tech visit is completed, if site is approved, request NWS Central Region headquarters prepare Cooperator Agreement for IA Assoc. Electric Cooperatives signature
- NWS to begin lease negotiations with tower owner
- Once lease is signed, state **contacts** and coordinate rigging of tower with rigger and **tower** owner
- When tower rigging is complete, EMD proceeds with **installation** of transmitter at site
- **Transmitter is operational**
- Contact NWS local office, local officials and tower owner to schedule media/dedication day, if owner desires

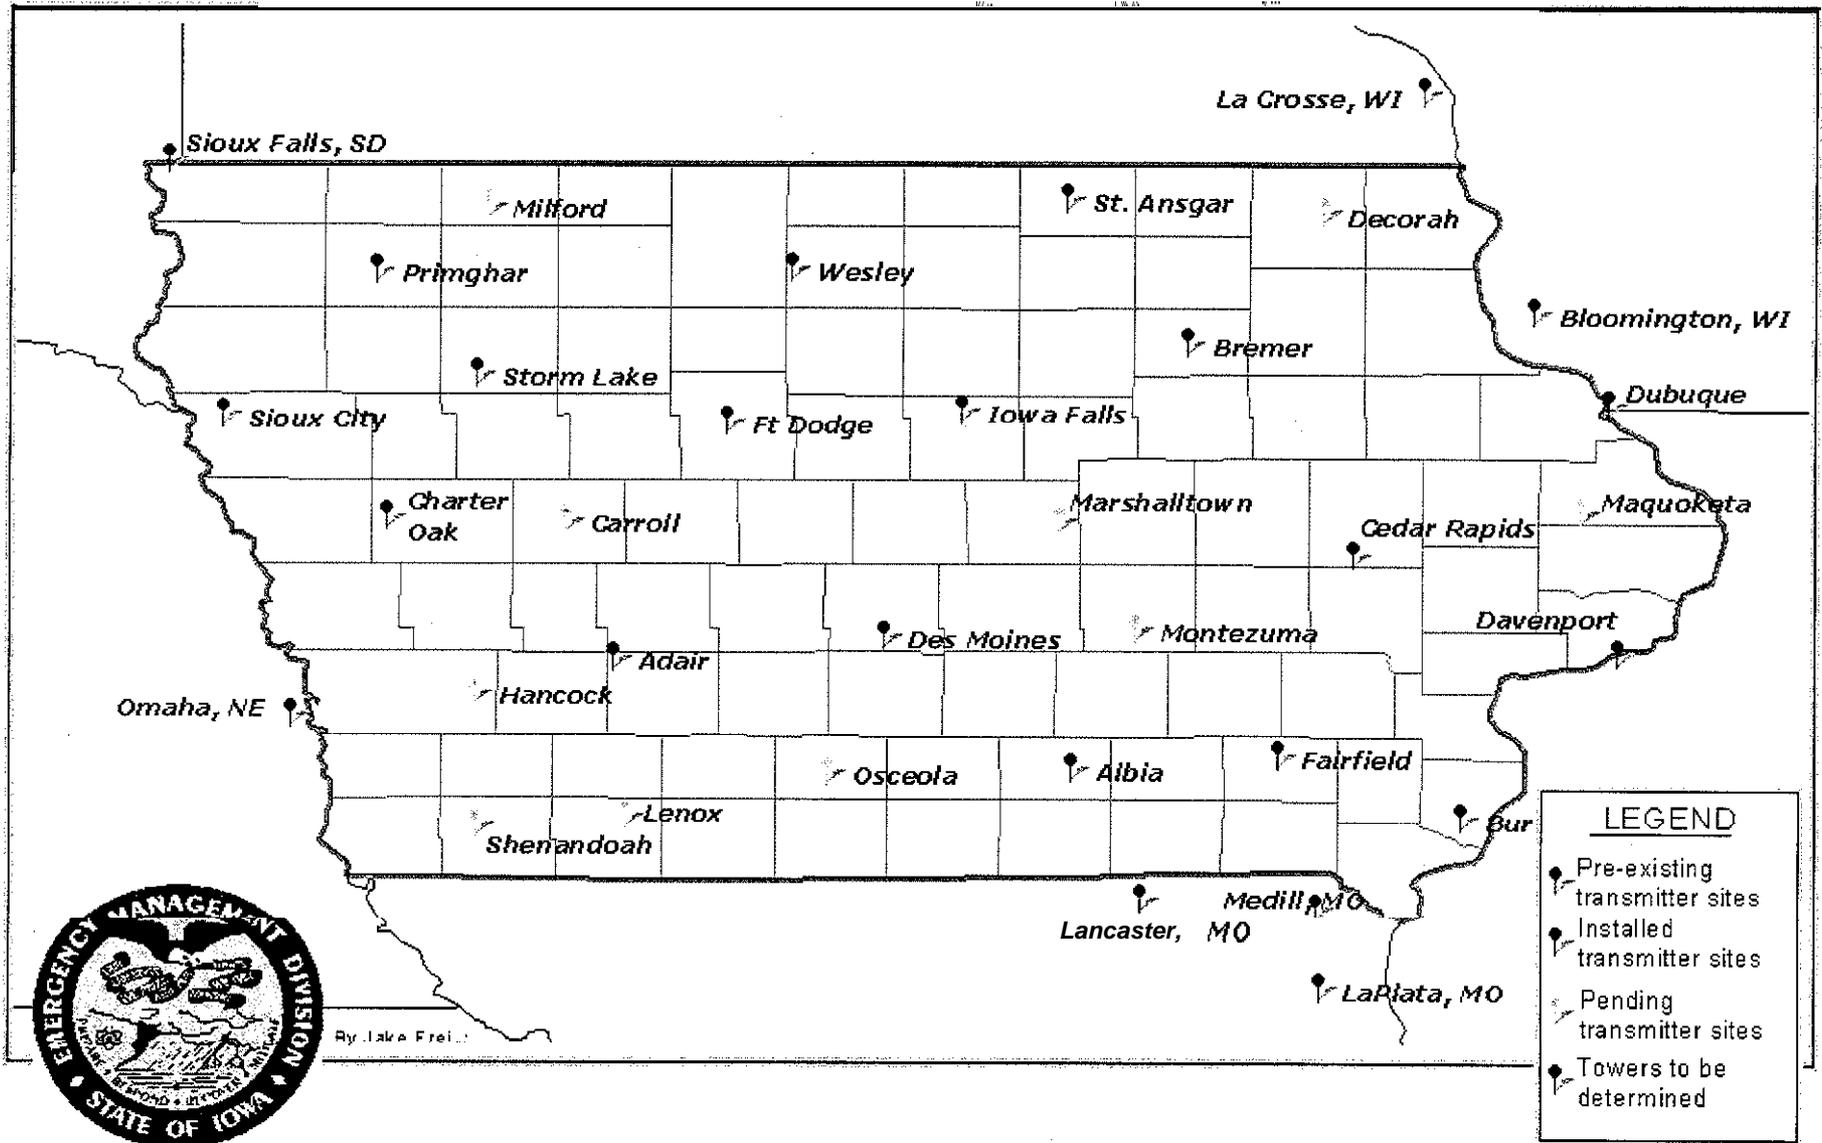

The Process

- 30 day testing period
- State facilitates the gifting of the transmitter to the National Weather Service
- If all steps in the previously displayed process go smoothly, the site could possibly be approved and ready for tower **rigging** and **transmitter** installation within 2-6 **months**.
